TRACKING, BENCHMARKING AND PROFILING IN ARCHERY

Athlete Development Curriculum

Athletes are supported with their learning and development through targeted training programmes and competitive opportunities for each level. Athletes will have a clear understanding of what they need to know and do to reach the next stage of their development.

Tracking and Benchmarking

Athletes are tracked through their development on key elements of their programme so that they can monitor their progress. They will also undergo benchmark testing which helps them view their trajectory referenced against the World's best archers at that specific stage of development. What is tracked and benchmarked may change throughout the pathway dependent upon the curriculum demands at each level.

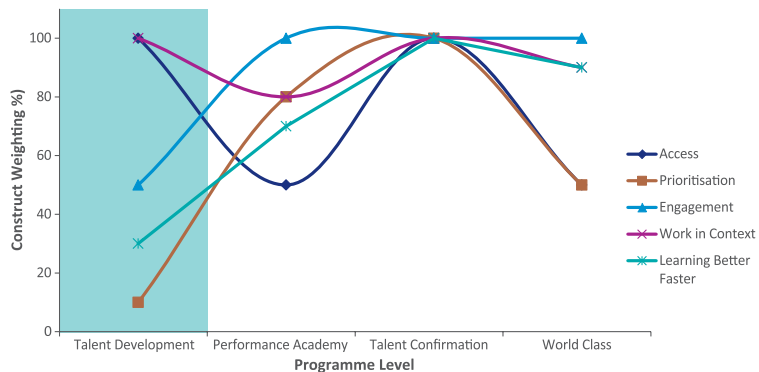

Athlete Profiling

Athletes undergo a process of assessment on key characteristics identified as being predictive of World Class success. These will be stable throughout the pathway, but weighted appropriate to the age and stage of the athlete being profiled at each level.
