

Archery GB January Challenge

2018

This year there were 2006 scores submitted, a disappointing fall on last year! Overall the proportions were once again virtually the same, with 70% of scores shot by men and 30% by women; this was again reflected in each bow style (though ladies shot a higher proportion in Barebow, and gentlemen in Compounds). The ratios by bow style were also virtually identical: 63% recurve, 13% compound, 13% in Barebow, 11% in Longbow. 142 clubs submitted scores, again slightly fewer than last year. It was very pleasing, however, to see more University clubs represented. We have again this year shown the age of junior archers when provided (the numbers in red); there is no special category for them. I have also added notes in red for VI or AFB archers where I have been told.

We have also recorded our first perfect score! Congratulations to the archer involved – I leave you to read the scores to find who it is.
