

Olympic Squad List 2020/2021

OLYMPIC SQUAD

The Olympic selection process started on 9 March 2020 which marked the closing date for the submission of selection shoot scores, and should have concluded by 31 March 2020. At that point, seven athletes (three women and four men) had achieved the required scores. Therefore, the Olympic selection process was only partially complete before the national and international shutdown, and subsequent postponement of the Olympic Games, with three women able to be nominated to the BOA for selection to the team, and four men remaining eligible to take part in the required selection shoot.

Due to the extraordinary national and international circumstances and the uncertainty of archery returning to domestic and international competition normality, it is proposed to revise the existing Olympic selection document regarding Reserves with the addition of a standby status.
